

## Covid-19 Update

As you are aware these are unprecedented times. This is a reach out to all of the HIWT Family including current students and alumni, our corporate clients and our vendors, to offer our thoughts of each of you and your families during this difficult time.

Hobart Institute of Welding Technology puts the safety and well-being at the highest priority for our students and all families, including yours.

Here at the school, we have made the very difficult decision to suspend our skill education for a minimum of four weeks beginning March 16<sup>th</sup> to limit any potential Covid-19 exposure to staff, students and the community. We continue to be extremely proactive in maintaining a campus with an abundant amount of caution in cleaning and hygiene awareness while taking guidance from the CDC and local Health Officials.

Welding is who we are and welding will always be where we go. We look forward to moving beyond this crisis and back to having our campus full of students and serving our Mission.

We extend our best wishes to you and the entire Welding Industry. Thank you all for your continued support of our Institute.

Scott A. Mazzulla

President
