## RECOMMENDED PRESTUDY FOR PREPARATION FOR CERTIFIED WELDING INSPECTOR EXAM COURSE AT HOBART INSTITUTE OF WELDING TECHNOLOGY

If you are planning to take the CWI course and exam and you would like to study prior to the course, you may consider:

- Obtain a copy of the AWS QC1 Specification for AWS Certification of Welding Inspectors.
   This is available free as a download from the American Welding Society website at <a href="http://www.aws.org/library/doclib/QC1-2016.pdf">http://www.aws.org/library/doclib/QC1-2016.pdf</a>. This is the standard for all AWS-CWIs. Read it completely.
- 2. When you have selected the code you will use for the Part C Open Code Book part of the exam, you should purchase that code book. This may be purchased from <a href="http://www.welding.org/product-category/books/welding-codes-specifications/">http://www.welding.org/product-category/books/welding-codes-specifications/</a> or directly from the publisher. Look how it is organized: the table of contents, the index. Learn how to find information quickly and understand what each section covers. Bring this code book with you to the class.
- Obtain a copy of the AWS Part B Examination Book of Specifications. This is available
  free as a download from the American Welding Society website at
  <a href="https://weldingclassroom.com/wp-content/uploads/2018/01/cwi-partB-BOS-customary20170418.pdf">https://weldingclassroom.com/wp-content/uploads/2018/01/cwi-partB-BOS-customary20170418.pdf</a>. Read it from cover-to-cover including the footnotes. This book of
  specifications is the standard you will use for the Part B examination.
- 4. If you are experienced in welding but have limited experience in welding inspection, you may choose to attend the *Arc Welding Inspection* (AWI520) at the Hobart Institute to get basic inspection training. <a href="https://www.welding.org/hiwt-technical-training-agreement/">https://www.welding.org/hiwt-technical-training-agreement/</a>. This course is *not* a prerequisite requirement for the CWI course, but can be very beneficial for someone starting out in welding inspection.
- 5. If you cannot attend the *Arc Welding Inspection*, you may want to purchase the *AWS Certification Manual for Welding Inspectors*. <a href="http://www.welding.org/product/certification-manual-welding-inspectors/">http://www.welding.org/product/certification-manual-welding-inspectors/</a>. It is for self-study. Read each section and answer the questions at the end of each section.
- 6. If you lack welding process experience, you may want to take the 4-day *Welding for the Non-Welder* course at Hobart Institute. <a href="https://www.welding.org/hiwt-technical-training-agreement/">https://www.welding.org/hiwt-technical-training-agreement/</a>. It provides welding process information and hands-on practice with oxyacetylene welding, shielded metal arc, gas tungsten arc, gas metal arc and flux cored arc welding processes.
- 7. You may take the online *Welding Symbols Course* <a href="http://www.welding.org/product/symbols-for-welding/">http://www.welding.org/product/symbols-for-welding/</a> on the Hobart Institute website. Also, the *Visual Inspection Course* is online at <a href="https://www.welding.org/product/visual-inspection-2/">https://www.welding.org/product/visual-inspection-2/</a> which may be helpful to you.
