

SUPPLY KIT

Personal protective equipment (PPE) and tools are essential for your success in our programs and for entering the workforce as a skilled welder. All students enrolled in the Pathways or Structural Welding Programs must have the tools and PPE listed below. To ensure all students have the necessary supplies and PPE for training, a mandatory supply kit fee will be charged. Your supply kit will be provided at orientation or during the Welding Technology and Blueprint Reading course depending on your course schedule.

Students are responsible for their supply kits and their upkeep. The Institute has a supply store open twice a day for students who need to purchase replacement tools and PPE. Below is a detailed list of the items included in the supply kit.

Total: \$1,250.00
